

SHAYEGAN DADE ELECTRIC POUYESH

is a knowledge-based company (consisting of electrical, mechanical and computer engineers) due to strong organization based on experience, up-to-date technical knowledge, excellent expertise along with honesty, potential of skilled experts in manufacturing SSR relays, industrial automation and manufacturing industrial testing and design devices.

The technical team of this company guarantees the implementation of large projects in all stages of work in accordance with the standards and quality desired by the employer.

OIL COOLER AIR LEAK TEST

An oil cooler is one of the car parts that is designed to cool the oil and keep the oil temperature in the normal working range. Oil cooler air leak test device has been designed and produced by the engineers of this company to measure the amount of oil cooler air leakage.

The operating range of the device is 5 cc per minute and the accuracy of the device is equal to 0.2 cc per minute.

The air leak tester is designed and manufactured in single-user and dual-user.

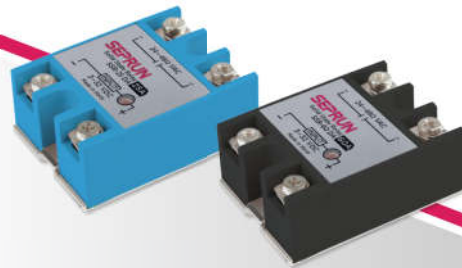

Leak Test Unit

SOLID STATE RELAY

Product Specifications:

- AC and DC
- Input Voltage 3 to 23 Volts
- Output Voltage 24 to 380 Volts
- Maximum Output Current 40 Amps.
- Snubber Protection
- Varistor Protection

This Device is a product of Shayegan Company, which is being produced based on technical knowledge and experts.

Brake Caliper Functional Tester

AREAS OF ACTIVITY

- Electrical design of all types of electronic components
- PLC Programming
- Industrial Automation
- Manufacture of industrial and laboratory testing devices
- Remote control of production lines
- Gather information and track products

This Company started its activity in two fields of power electronics and manufacturing production lines and device manufacturing by manufacturing testing devices and assembly lines of some auto parts for Basa Pars Sanat Company. Manufactured test devices are: Turbocharger Proportional Valve Test Machine, Turbocharger High Pressure Leak Testing Machine, Power Steering Pump Leak Testing Machine, Hydraulic Steering Pump Performance Testing Machine and Vacuum Turbocharger Leak Testing Machine and Production Lines are: Car water pump assembly line
